|   | 2015             | 2021            |  |  |  |
| Percentage of pregnant women living with HIV accessing antiretroviral medicines | 14%<br>[12–16%]  | 23%<br>[20–25%] |  |  |  |
| Final vertical transmission rate including during breastfeeding                 | %<br>[–%]        | %<br>[–%]       |  |  |  |
| Early infant diagnosis  | <1%<br>[<1– <1%] | %<br>[–%]       |  |  |  |

## **HIV COMORBIDITIES**

| Estimated and be of inside at the conduct.  | 14 000            |
|---|-------------------|
| Estimated number of incident tuberculosis cases among people living with HIV (2020) | [9100<br>–19 000] |
|   | -17 000]          |

People living with HIV who started TB preventive therapy (2020)

Cervical cancer screening of women living with HIV

People coinfected with HIV and hepatitis C virus starting hepatitis C treatment

## **HIV PREVENTION**

Adults aged 15+ years with unsuppressed viral load

Knowledge of HIV prevention among young people aged 15–24 years (2017)

— Women 1.8%— Men 5.9%

Condom use at last sex with a non-marital, non-cohabiting partner among people aged 15–49 years

— Women

— Men

Women aged 15–49 years who have their demand for family planning satisfied by modern methods

Men aged 15–49 years who are circumcised Applicable

Voluntary medical male circumcisions Not performed according to national standards applicable

...

73

People who received PrEP at least once during the reporting period

#### Harm reduction

- Use of sterile injecting equipment at last injection
- Needles and syringes distributed per person who injects (2021)
- Coverage of agonist opioid methadone therapy
- Naloxone available (2022) No
