

19.1 MILLION GIRLS AND WOMEN LIVING WITH HIV

Girls and women make up more than half of the 36.9 million people living with HIV. Ending AIDS by 2030 requires that we address girls' and women's diverse roles by putting them at the centre of the response.

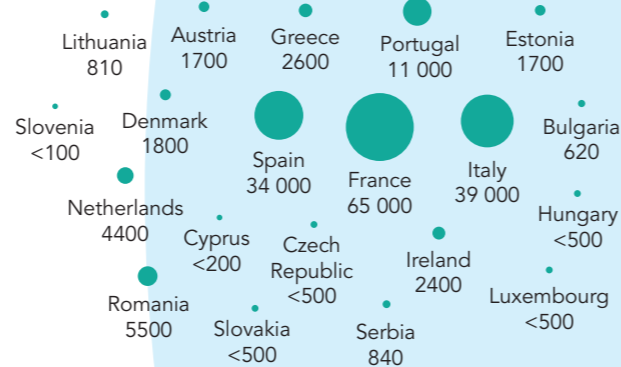

Latin America and the Caribbean

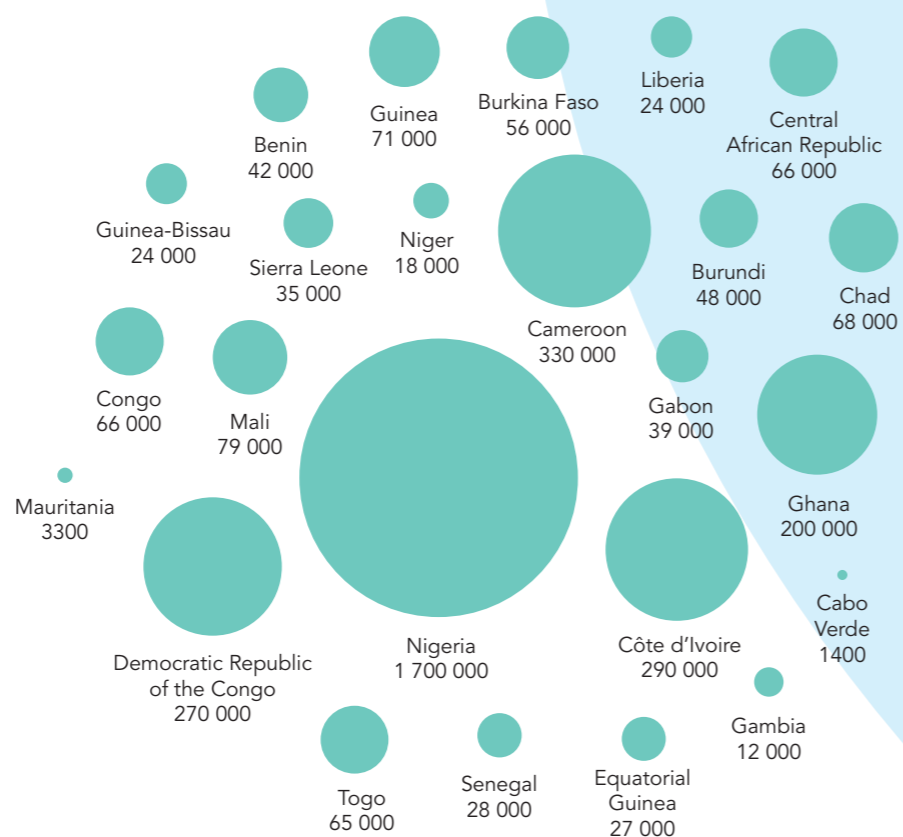

Eastern Europe and central Asia

Western and Central Europe and North America

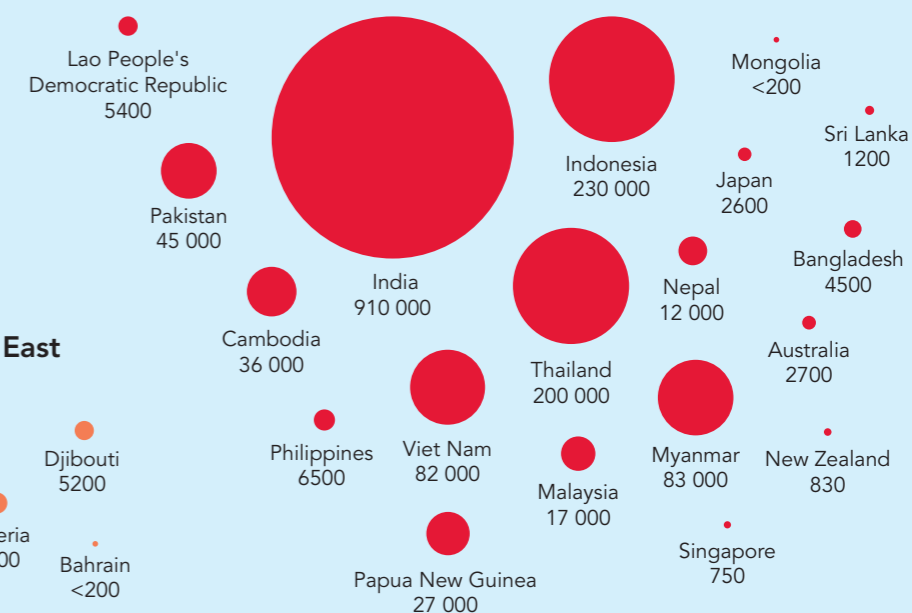

Africa—western and central Africa

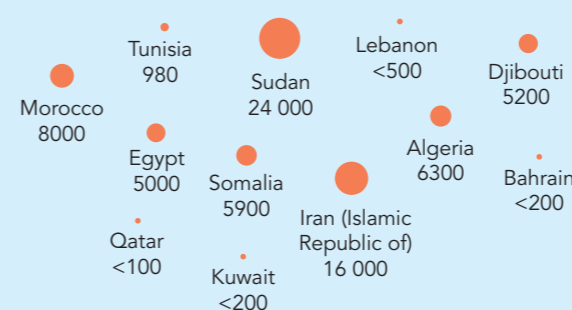

Global 19 100 000

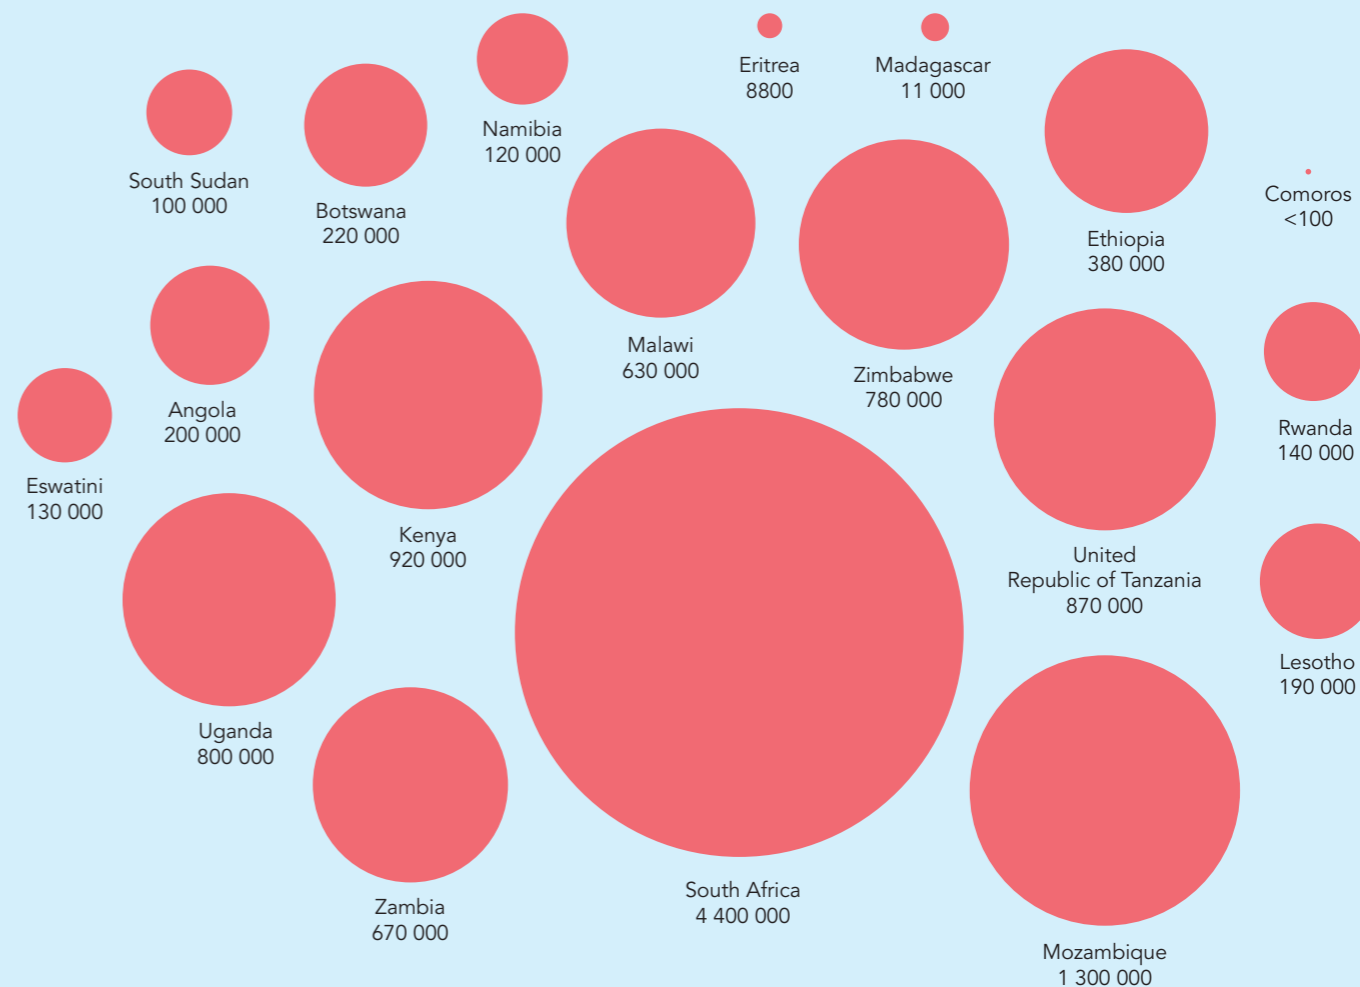

Asia and Pacific
